DETAIL ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as following:

In the claim, claim 1, line 3, delete "begin" and insert --being-- before "connected".

Line 1 of claims 6-9, delete "Apparatus" and insert -- The apparatus-- before

"for".

Claim 10, line 1, delete "The" before "method" and insert -- A-- before

"method";

line 10, delete "the" before "male" and insert --a-- after

"connecting";

line 14, delete "the" before "bayonet" and insert --a-- after

"inserting"; and

line 15, delete "said" before "second" and insert --a-- after "by".

The above noted amendment has been added in order to provide a clarification in claim language.

Reasons For Allowance

- 2. Claims 5-12 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose an apparatus for energizing an electrical operated device from a conventional wall switch having first and second female outlet sockets, the apparatus comprising a first adapter including first and second male input plugs adapted for insertion into first and second

Art Unit: 2821

female outlet sockets respectively, said adapter further including a third female outlet socket for receiving a third male plug connected to one end of a two wire power line for continuously supplying electrical power to said device from the first female socket, said first adapter further including means for applying a control voltage to said two wire power line when said second socket receives switched power from said source, and a second adapter comprising, in combination, a manually operated device switch, an electrically operated switch for connecting and disconnecting said electrically operated device and said two wire power line, and a control circuit for actuating said electrically operated switch in response to both said control voltage received via said two wire power line and to the actuation of said manually operated switch as required in claim 5. The prior art also lacks to provide steps of connecting a first adapter to a first existing wall outlet that receives continuous power from an available source, connecting said first adapter to a second existing wall outlet that receives switched power via a conventional electrical wall-mounted switch, connecting a male plug at the end of lamp's existing two-wire power supply line to the first adapter to receive continuous power from said first existing wall socket and to receive a control voltage derived from said switched power received at said second existing wall socket, and inserting a bayonet base of a second adapter into a bulb socket of said lamp and inserting said light bulb into a second bulb socket defined by a second adapter, said second adapter further including a second manually operated switch and a control circuit responsive to the operation of said second manually-operated switch and to said control voltage for energizing and deenergizing said light bulb as required in claim 10.

- 4. The remaining dependent claims are allowable for at least above reason.
- 5. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. None of recorded prior arts stands alone or combination with others discloses all limitation required in claim invention.
